Notes: (1) Pursuant to CASBE, the racks leased under the New Data Center Racks Tenancy Contract will be recognized as right-of-use assets. Annual caps of the rack rental are set based on the total value of the right-of-use assets of racks expected to be leased by the Company in each year, which is calculated with reference to the total annual rentals of racks leased by the Company each year throughout the lease term, and discounted at the Company's incremental borrowing rate.

(2) Pursuant to CASBE, the additional charges will be directly included in costs due to failing to meet the definition of lease payment, and its annual caps shall be the maximum amount of the additional charges to be paid by the Company to CTCD during the relevant period.

(2) Basis of Determination of the Annual Caps

The annual caps of rack rental are determined based on the following factors: Server room 3FM2 of Intelligent Computing Module mainly supports intelligent computing workloads. To optimize the Company's intelligent computing resource layout and enhance the specialized operational capabilities of AI infrastructure, we propose to centrally deploy the intelligent computing servers and related supporting equipment in the server room of Jiaxing Intelligent Computing Module. In order to satisfy the needs of new production and operation and customer service, the Company will lease additional racks in server room 3FM2 of Intelligent Computing Module of Jiaxing Data Center in addition to the racks in server rooms 2FM1, 2FM3, 2FM4, 3FM3, 4FM3 and 4FM1 of Jiaxing Data Center, amounting to a total of 1,597 racks and the estimated annual rental fees are calculated based on the unit price of the rack rental and the planned rack installations for the next three years. Annual caps of the rack rental are set based on the total value of the right-of-use assets of racks expected to be leased by the Company in each year, which is calculated with reference to the total annual rentals of racks leased by the Company each year throughout the lease term, and discounted at the Company's incremental borrowing rate. In addition, annual caps of the rack rental will provide adequate buffer for the increase in rack utilization rate arising from the expected business growth of the Company in the future.

The annual caps of additional charges are determined taking into consideration the possible need for racks to operate in excess of their power limits during the lease term.
